

**REPORT OF THE HOUSE INTERIM COMMITTEE ON
THE A+ SCHOOLS PROGRAM**

December 30, 1999

December 30, 1999

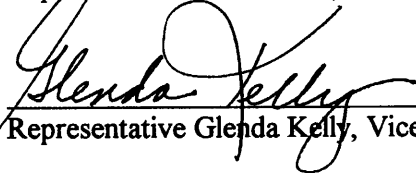

The Honorable Steve Gaw
Speaker of the House
State Capitol
Jefferson City, MO 65101

Dear Mr. Speaker:

The House Interim Committee on the A+ Schools Program you appointed has met, taken testimony, deliberated, and concluded its evaluation of the A+ Schools Program. The undersigned members of the Committee are pleased to submit the attached report.

Representative Ted Farnen, Chair

Representative Glenda Kelly, Vice-Chair

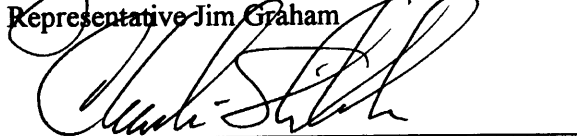

Representative Mark Abel

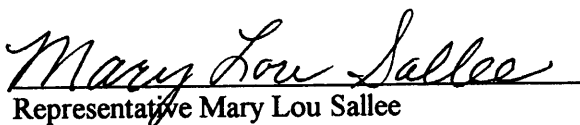

Representative Marsha Campbell

Representative Jim Graham

Representative Charles Shields

Representative Mary Lou Sallee

I. Introduction

In 1993, Senate Bill 380 Act was passed by the Missouri legislature, establishing the A+ Schools Program (Appendix A contains a copy of Section 160.545, RSMo, enacted by Senate Bill 380).

In response to the reality that approximately one-fourth of high school students in the state never graduate from high school, the program was established to help reduce the high school drop-out rate and to help connect non-baccalaureate degree-seeking high school students to high wage jobs through (1) graduation from high school; (2) completion of challenging high school studies for which there are identified learning expectations; and (3) advancement from high school graduation to a college, post-secondary vocational or technical school, or high wage job with workplace skill development opportunities (see Section 160.545.1, RSMo, in Appendix A). The program is based on the philosophy that the high school experience should not lead toward dropping out, dependence on public assistance, or low-wage jobs, but rather should lead to skill development to help insure a successful and productive adulthood. The cornerstone of the A+ Schools Program is a multifaceted partnership among and requiring a commitment from high schools, students, parents, the higher education community, the business sector, citizens, and the state. Participating high schools are required to modify their curriculum to meet the needs of students, eliminate the general education track, and to provide one-half of the salary for an A+ Program Coordinator. Students are required to maintain at least a 2.5 GPA, maintain a school attendance rate of at least 95%, avoid drugs, criminal involvement and school suspension, and be involved in mentoring activities with younger students. The state's commitment consists of providing teacher training, technical assistance, funding for annual grants for three years to high schools, and funding for the

costs of two years of community college or vocational-technical school for all eligible students.

Appendix B contains a specific listing of the A+ Schools Program requirements¹.

Since there is now several years of experience with the A+ Schools Program, the Speaker of the House appointed an interim committee to evaluate its effectiveness and to develop recommendations for any needed modifications or enhancements. The Speaker of the House appointed Representative Ted Farnen (Chair), Representative Glenda Kelly (Vice-Chair), Representative Mark Abel, Representative Marsha Campbell, Representative Jim Graham, Representative Charles Shields, and Representative Mary Lou Sallee to the House Interim Committee on the A+ Schools Program.

The Committee held two public hearings in Jefferson City, on November 29, 1999 and on December 14, 1999. The December 14 hearing also served as a work session during which committee members discussed the information provided to the committee and formulated recommendations. Following is a discussion of the Committee's evaluation of and recommendations for the A+ Schools Program, based on the testimony provided by officials from the Missouri Department of Elementary and Secondary Education, the Missouri Department of Higher Education, high school A+ Schools Program Coordinators, high school counselors and principals, school superintendents, high school students, community college faculty, and the Missouri Community College Association.

II. Current Program Participation and Levels of State Funding

Number of High Schools

In the 1994-1995 school year, 38 high schools in the state were designated as A+ high schools, each eligible for up to \$150,000 in annual grant awards for each of three years. The program has steadily grown each year since, with 79 high schools participating as grant recipients in the 1999-2000 school year (see Appendix C for a year-by-year listing of the number of high schools applying for A+ designation and the number of approved high schools²). Department of Elementary and Secondary Education (DESE) officials report that there are 93 high schools participating in the program without state grant assistance, and approximately 54% of Missouri high schools (262 out of 486 eligible high schools) are now participating in or have expressed interest in participating in the A+ Schools Program.

Number of Students and Post-Secondary Attendance

There were 433 students in the first cohort of A+ high school graduates in 1997; this number has increased dramatically to 2,929 in 1999. The vast majority of these graduates attended an eligible community college with tuition assistance provided by the state (85% of A+ high school graduates in 1997 (n=302) and 79% in 1999 (n=1,697)). A small proportion of these students attended an eligible vocational-technical school with tuition assistance provided by the state (3% of A+ high school graduates in 1997 (n=9) and 2% in 1999 (n=33)). Looking at the chosen fields of study only for the 1998 cohort of high school graduates (n=839), 657 or 78% pursued a university transfer or general education degree, with 77% (n=506) of those who began

such a program receiving a degree; in contrast, 22% or 182 students in the 1998 A+ cohort pursued vocational or technical degree certification.

Interestingly, a small but significant proportion of A+ high school graduates attended a four-year public college or university without state tuition financial assistance (12% of A+ high school graduates in 1997 (n=42) and 19% in 1999 (n=422))³. Testimony provided to the committee suggests that some A+ graduating students use the A+ program as a back-up plan to their aspiration of attending a four-year school, and, with acceptance into a four-year program, do not take advantage of the program's financial assistance for a two-year program. Other students have indicated that they have no intention of using the A+ financial assistance for a two-year program but rather participated in the A+ high school program because designation as an A+ graduate confers prestige. Appendix E contains data showing the distribution of A+ high school graduates attending two-year and four-year post-secondary institutions for 1997, 1998 and 1999.

Level of State Funding

As previously mentioned, the state's commitment to the A+ Schools Program involves funding both grants to designated high schools and for tuition assistance for all eligible students to attend a two-year program at a community college or vocational-technical school. For Fiscal Year 2000, the proportion of the total state appropriated funds for the high school grants and for tuition assistance is 62% and 38% respectively. Up to the present time, funding requests for the tuition assistance portion of the A+ program have been less than projected, thus freeing up funds

to allow additional high schools to be designated for inclusion in the program. The program began with a state appropriation of \$5 million in 1994. The level of funding has increased each year since 1994:

	<u>Amount Appropriated</u>
1995	\$7.5 million
1996	\$10.5 million
1997	\$13 million
1998	\$13.9 million
1999	\$15.4 million

After designation as an A+ school, high schools are eligible for an annual grant of up to \$150,000 for each of three years. Grant awards typically range from \$100,000 to \$150,000 per year. Assuming a maximum annual grant of \$150,000 per high school, the state must appropriate an additional \$450,000 for each high school accepted into the A+ Schools Program. DESE officials estimate that it will cost approximately \$44.3 million to extend the program through the year 2002.

III. Evaluation of the A+ Schools Program

A. Statistical Indicators Aggregated data tracking A+ students, categorized into one of three annual cohorts of high schools (1997, 1998, and 1999), were provided to the Committee by DESE and the Department of Higher Education. Please note that Appendix G contains drop-out rates, attendance rates, graduation rates, and average ACT scores for individual A+ schools.

1. High School Performance

a. Drop-out Rates -- The annual percentage of A+ students dropping out of high school is compared to annual statewide averages for 1994-1998. The data show the annual drop-out rate for A+ students to be consistently below the statewide average drop-out rate, for each of the five years, and across all three cohorts of high schools. The A+ rates range from .17% to nearly 2% below the statewide rates; these lower A+ drop-out rates persist, even though the statewide drop-out rates themselves have declined over the 1994-1998 time period (see Appendix F).

b. Attendance Rates -- High school attendance rates are shown in terms of the average percentage of school days students are not absent. The average daily attendance rates for A+ students are consistently higher than the statewide average rates, ranging from .63% to over 2% higher. These higher average A+ student attendance rates occur for each of the five years, 1994-1998, and across all three cohorts of high schools (see Appendix F).

c. High School Graduation Rates -- The average statewide percentage of students graduating from high school varies from 75.3% in 1994 to 77.37% in 1998. The average graduation rates for A+ students over this same time period is consistently higher than the statewide averages, ranging from 1.8% to 5.51% higher. These higher A+ graduation rates occur for each of the three cohorts of high schools (see Appendix F).

d. Academic Preparedness -- One measure of academic preparedness for postsecondary success is the percentage of high school students scoring above the national ACT average. Over 1994-1997, the highest percentage of students for all high schools in the state

scoring above the national ACT average was 34.29%. Data on ACT scores among all students attending an A+ designated high school were provided only for 1997; these data show 38.55% of these high school students scoring above the national ACT average (see Appendix F).

2. Post-Secondary Performance

a. College-Going Rates -- Among all 1998 public high school graduates in the state, 50% attended a post-secondary institution, with 59% of these students attending a four-year school and 41% attending a two-year institution. Since the vast majority of A+ high school graduates attend a two-year post-secondary institution (see Appendix D), only college-going rates for A+ students attending two-year schools were provided to the Committee. These data show a higher college-going rate among A+ students as compared to the 50% post-secondary attendance rate for all 1998 high school graduates:

Percent of A+ High School Graduates Attending 2-year Schools

1997 A+ Cohort	70%
1998 A+ Cohort	59%
1999 A+ Cohort	58%

b. College GPA -- Data were provided for cumulative GPA scores after one semester of post-secondary attendance for A+ students who graduated from high school in 1997. Among those attending eligible two-year institutions, the average GPA score was 2.71; for 1997

A+ students attending a four-year public institution, the average GPA score was 3.05.

3. Eligibility vs. Post-Secondary Enrollment and Attendance

Data were provided to the Committee examining the number of eligible A+ graduates who enroll and continue in two-year programs. Numerical and geographical representations of these data are found in Appendix H. The data show that 69% of the 1997 A+ cohort (300 out of 433 eligible students), 59% of the 1998 A+ cohort (842 out of 1,422 eligible students), and 58% of the 1999 A+ cohort (1,693 out of 2,913 eligible students) enrolled in a first year fall semester at a two-year college. Data for completion of this semester and ongoing enrollment are available only for the 1997 and 1998 cohorts. Virtually all of the A+ students in both cohorts who enrolled in the first year fall semester also completed this term (98.7% of the 1997 cohort (n=296) and 100% of the 1998 cohort (n=842)). Among these students, the vast majority also completed the first year spring semester (91% or 273 students in the 1997 cohort, and 87.9% or 740 students in the 1998 cohort). For the second year of the two-year degree programs, data are available only for the 1997 cohort; these data show that 83.7% (n=251) of those initially enrolling in a two-year program completed the second year fall semester. By the end of the second year, nearly one-third (29% or 87 students) of the 1997 A+ cohort who initially enrolled in a two year program had received a certificate or associate's degree; nearly one-fourth of this group (22.6% or 98 students) had enrolled in a third year fall semester.

The geographical displays of eligibility and enrollment data for A+ students found in Appendix H

suggest that the physical proximity of high schools to community colleges and vocational technical schools is one influence on A+ student enrollment in a two-year program. Geographical proximity to community colleges and vocational technical schools may also influence whether or not a given high school in the state seeks A+ designation.

B. Personal Experiences with the A+ Schools Program

The Committee heard from a number of witnesses who have had personal experiences with the A+ program, either in a teaching or program coordinator capacity, or as a student. The testimony provided indicates overwhelming support for the program. Several high school A+ Program Coordinators reported significant reductions in the drop-out rates for A+ students; in one high school, the drop-out rate is now less than 4%, and in another high school, the drop-out rate was reported to be reduced by one-half. But in addition to helping keep students in high school, witnesses report that the A+ program has an important and positive affect on the quality of the high school experience. Changes in the curriculum required by the program and the mentoring/tutoring involvement required of all A+ students result in students being more enthusiastic about and involved in their education, and more connected to others. Students participating in the A+ program also develop skills in goal setting and career planning, both of which are important components for post-secondary attendance and success. The A+ program was also described as enhancing the involvement of parents in their children's education, and as promoting important partnerships among various community sectors. For example, one partnership described by a witness representing the Missouri Community College Association

involves an agreement between Southeast Missouri State University (SEMO) and area community colleges to allow community college offerings at SEMO and at the community college tuition rate. The A+ Schools Program was unanimously described by the witnesses as an effective and important tool which provides an important bridge between high school and post-secondary education.

There were only two issues witnesses discussed as areas warranting change or improvement. First, the Committee heard testimony that additional funding is needed for the program, to help insure that existing A+ programs are able to continue in the participating high schools and to also designate additional high schools as A+ schools. Second, the Committee heard from witnesses who believe that the geographical distance involved in attending an eligible two-year institution discourages St. Joseph A+ high school graduates from using the program's financial assistance for post-secondary education. The nearest eligible institutions for St. Joseph A+ graduates are found in the Kansas City area. The distance involved imposes costs to the St. Joseph students, in terms of transportation and living away from home, which are difficult if not impossible to bear. One St. Joseph A+ program graduate relayed that her choice of field of study was changed, only because she was unable to finance the added costs of attending a Kansas City-area institution which offered her preferred course of study. These witnesses requested that St. Joseph A+ graduates be allowed to use the A+ financial assistance to enroll in and complete one of the two-year programs offered by Missouri Western State College, a four-year institution.

IV. Discussion and Recommendations

All of the information and testimony presented to the Committee indicate that the A+ Schools Program is a highly successful program, and is meeting its key objective of graduating students from high school with the skills needed for success in an institution of post-secondary education. The Committee advances recommendations related to funding issues.

The Committee recommends that the legislature allocate additional funds for the program, so that more students and more school districts in the state are able to participate in the program. The legislature should also work in coordination with DESE and the Department of Higher Education to insure that the A+ program continues at a consistent pace; this coordination should be aimed at preventing participating A+ schools from discontinuing their programs due to a lack or reduced availability of state resources. The state needs to assure participating school districts, schools, and students that the state can and will follow through on its commitment to the A+ Schools Program. The Committee also recommends that the legislature investigate the possibility of supplemental funding for school districts to allow the purchase of needed equipment to sustain the program and for ongoing funding of at least part of the salaries for A+ High School Coordinators, a vital part of program success. In tandem with the state's financial commitment, the Committee recommends that the program emphasize the importance for local school boards to plan ahead by making appropriate levels of budget allocations for the period after state funding ends. The multi-faceted partnership on which the A+ Schools Program is based requires that each partner demonstrate a commitment to the program; local school boards are a crucial partner and their

commitment is especially vital for the ongoing success of the A+ program.

A key funding issue involves whether to expand the A+ program so that students can attend a four-year institution, rather than limiting the financial assistance to attendance at a two- year or vocational-technical school. Although the Committee acknowledges that there are access problems in certain pockets of the state, expanding the program to offer financial assistance for attendance at four-institutions may not be prudent. As the A+ program is currently administered through rule and regulation, the program reimburses the costs of tuition, books, and fees for attendance only at public community colleges or vocational or technical schools (see Section 160.545.5, Appendix A). Funding for those currently participating could be adversely affected, if the A+ program is expanded to include four-year institutions. Although not all eligible students would use the financial assistance, there may be an increase in the number of students being reimbursed for college costs, if the program is expanded in this manner. Besides cutting into the availability of existing resources, such an expansion would obligate the state to multiple long-term financial commitments.

1. Information provided by the Department of Elementary and Secondary Education (DESE) and the Department of Higher Education.
 2. Data supplied by DESE and the Department of Higher Education.
 3. Appendix D contains data showing the numbers and post-secondary experiences of A+ high school graduates.

APPENDIX A

**Statutory Authorization for the A+ Schools Program
Section 160.545, RSMo**

160.545. A+ School Program established--purpose--rules--variable fund match requirement--waiver of rules and regulations, requirement-- reimbursement for higher education costs for students--evaluation.--

1. There is hereby established within the department of elementary and secondary education the "A+ Schools Program" to be administered by the commissioner of education. The program shall consist of grant awards made to public secondary schools that demonstrate a commitment to ensure that:

- (1) All students be graduated from school;
- (2) All students complete a selection of high school studies that is challenging and for which there are identified learning expectations; and
- (3) All students proceed from high school graduation to a college or postsecondary vocational or technical school or high wage job with work place skill development opportunities.

2. The state board of education shall promulgate rules and regulations for the approval of grants made under the program to schools that:

- (1) Establish measurable district-wide performance standards for the goals of the program outlined in subsection 1 of this section; and
- (2) Specify the knowledge, skills and competencies, in measurable terms, that students must demonstrate to successfully complete any individual course offered by the school, and any course of studies which will qualify a student for graduation from the school; and
- (3) Do not offer a general track of courses that, upon completion, can lead to a high school diploma; and
- (4) Require rigorous coursework with standards of competency in basic academic subjects for students pursuing vocational and technical education as prescribed by rule and regulation of the state board of education; and

(5) Have a partnership plan developed in cooperation and with the advice of local business persons, labor leaders, parents, and representatives of college and postsecondary vocational and technical school representatives, with the plan then approved by the local board of education. The plan shall specify a mechanism to receive information on an annual basis from those who developed the plan in addition to senior citizens, community leaders, and teachers to update the plan in order to best meet the goals of the program as provided in subsection 1 of this section. Further, the plan shall detail the procedures used in the school to identify students that may drop out of school and the intervention services to be used to meet the needs of such students. The plan shall outline counseling and mentoring services provided to students who will enter the work force upon graduation from high school, address apprenticeship and intern programs, and shall contain procedures for the recruitment of volunteers from the community of the school to serve in schools receiving program grants.

3. By rule and regulation, the state board of education may determine a local school district variable fund match requirement in order for a school or schools in the district to receive a grant under the program. However, no school in any district shall receive a grant under the program unless the district designates a salaried employee to serve as the program coordinator, with the district assuming a minimum of one-half the cost of the salary and other benefits provided to the coordinator. Further, no school in any district shall receive a grant under the program unless the district makes available facilities and services for adult literacy training as specified by rule of the state board of education.

4. For any school that meets the requirements for the approval of the grants authorized by this section and specified in subsection 2 of this section for three successive school years, by August first following the third such school year, the commissioner of education shall present a plan to the superintendent of the school district in which such school is located for the waiver of rules and regulations to promote flexibility in the operations of the school and to enhance and encourage efficiency in the delivery of instructional services in the school. The provisions of other law to the contrary notwithstanding, the plan presented to the superintendent shall provide a summary waiver, with no conditions, for the pupil testing requirements pursuant to section 160.257 in the school. Further, the provisions of other law to the contrary notwithstanding, the plan shall detail a means for the waiver of requirements otherwise imposed on the school related to the

authority of the state board of education to classify school districts pursuant to subdivision (9) of section 161.092, RSMo, and such other rules and regulations as determined by the commissioner of education, except such waivers shall be confined to the school and not other schools in the school district unless such other schools meet the requirements of this subsection. However, any waiver provided to any school as outlined in this subsection shall be void on June thirtieth of any school year in which the school fails to meet the requirements for the approval of the grants authorized by this section as specified in subsection 2 of this section.

5. Within the amount appropriated for the program, in addition to the grants to public schools authorized by subsections 1 to 3 of this section, the commissioner of education shall, by rule and regulation of the state board of education and with the advice of the coordinating board for higher education, establish a procedure for the reimbursement of the cost of tuition, books and fees to any public community college or vocational or technical school for any student:

(1) Who has attended a public high school in the state for at least three years immediately prior to graduation that meets the requirements of subsection 2 of this section; and

(2) Who has made a good faith effort to first secure all available federal sources of funding that could be applied to the reimbursement described in this subsection; and

(3) Who has earned a minimal grade average while in high school as determined by rule of the state board of education, and other requirements for the reimbursement authorized by this subsection as determined by rule and regulation of said board.

6. The commissioner of education shall develop a procedure for evaluating the effectiveness of the program described in this section. Such evaluation shall be conducted annually with the results of the evaluation provided to the governor, speaker of the house, and president pro tempore of the senate.

(L. 1993 S.B. 380 § 14)

*Contingent expiration date. See section 143.107.

(1996) Contingent referendum provision was found to be an unconstitutional delegation of legislative authority thereby making section 143.107 void. Akin v. Director of Revenue, 934 S.W.2d 295 (Mo.banc 1996).

APPENDIX B

A+ Schools Program Requirements

Information provided by DESE and the Department of Higher Education

A+ SCHOOLS PROGRAM REQUIREMENTS

- 1. Establish measurable district-wide performance standards for the three A+ Schools goals:**
 - All students graduate from high school;**
 - All students complete a selection of high school studies that is challenging and for which there are identified learning expectations;**
 - All students proceed from high school graduation to a college, postsecondary vocational school or a high wage job with workplace skill development opportunities.**
- 2. Specify knowledge, skills, and competencies in measurable terms for all high school courses (CAREER PATHS or PROGRAM OF STUDIES) leading to graduation.**
- 3. Eliminate the GENERAL TRACK OF COURSES, that upon completion leads to a high school diploma, BUT NO JOB and/or DOES NOT MEET COLLEGE ENTRANCE REQUIREMENTS.**

- 4. Establish student performance standards for graduation that meet or exceed the Show-Me Standards adopted by the State Board of Education.**
- 5. Require rigorous coursework in academic subjects for all vocational students (again, emphasizing the importance of core courses).**
- 6. Detail procedures to identify potential dropouts and offer intervention services.**
- 7. Outline counseling/mentoring services for students going to work after graduation.**
- 8. Address apprenticeships and internship programs.**
- 9. Identify procedures for recruiting community volunteers to serve in the school.**

10. Develop an "A+ Schools Partnership Plan" with:

- Cooperation of business, labor, parents, colleges, and vocational schools**
- Plan to be approved by the local board of education**
- Plan to identify means to receive information annually to update the plan from original planning group, senior citizens, community leaders, and teachers**

11. Have an A+ Schools Coordinator (50% match at local level).

12. Have grants up to \$150,000 in state money, with local match of 25% on all funds except those associated with A+ Schools Coordinator.

13. Grant cycle:

- RFPs issued by January 1, (December 1, 1999) annually**
- Grant applications due to DESE by March 31**
- Readers review and rate applications in May/June**
- Grant awards made effective July 1**

PRELIMINARY ASSESSMENT OF THE A+ SCHOOLS PROGRAM THREE YEARS OF DESIGNATED A+ SCHOOLS

ACT Scores - Missouri School Improvement Program looks at the percent of high school students who score above the National ACT Average.

1994-97 For all high schools in Missouri, the highest percent of students who scored above the National ACT Average was 34.29%.

1997 54 designated A+ high schools had a total of 38.55% of their students scoring above the National ACT Average.

The first 38 A+ high schools (those in the program the longest) had 39.08% of their students scoring above the National ACT Average Score.

1995-1999 First Wave of 38 Schools -- 22 raised their scores (58%)
Second Wave of 19 Schools -- 13 raised their scores (68%)
Third Wave of 29 Schools -- 19 raised their scores (66%)

1999 % of Eligible % of Cohort	2913 100%	1693 58.1% 100%			
Year 2					
1997 % of Eligible % of Cohort			251 58.0% 83.7%	231 53.3% 77.0%	< 1 Year Cert. 2 1 Year Cert. 2 2 Year Cert. 1 Assoc. Deg. 31 AAS Degree 14 AA Degree 35
1998 % of Eligible % of Cohort		623 43.8% 74.0%			
Year 3					
1997 % of Eligible % of Cohort		98 22.6% 32.7%			

¹ Students may receive more than one Certificate and Degree.

Missouri A+ Students

Eligible A+ Students versus
Enrollment of A+ Students at
each A+ High School

1997 A+ Eligible Students = Green
1997 A+ Enrolled Students = Yellow

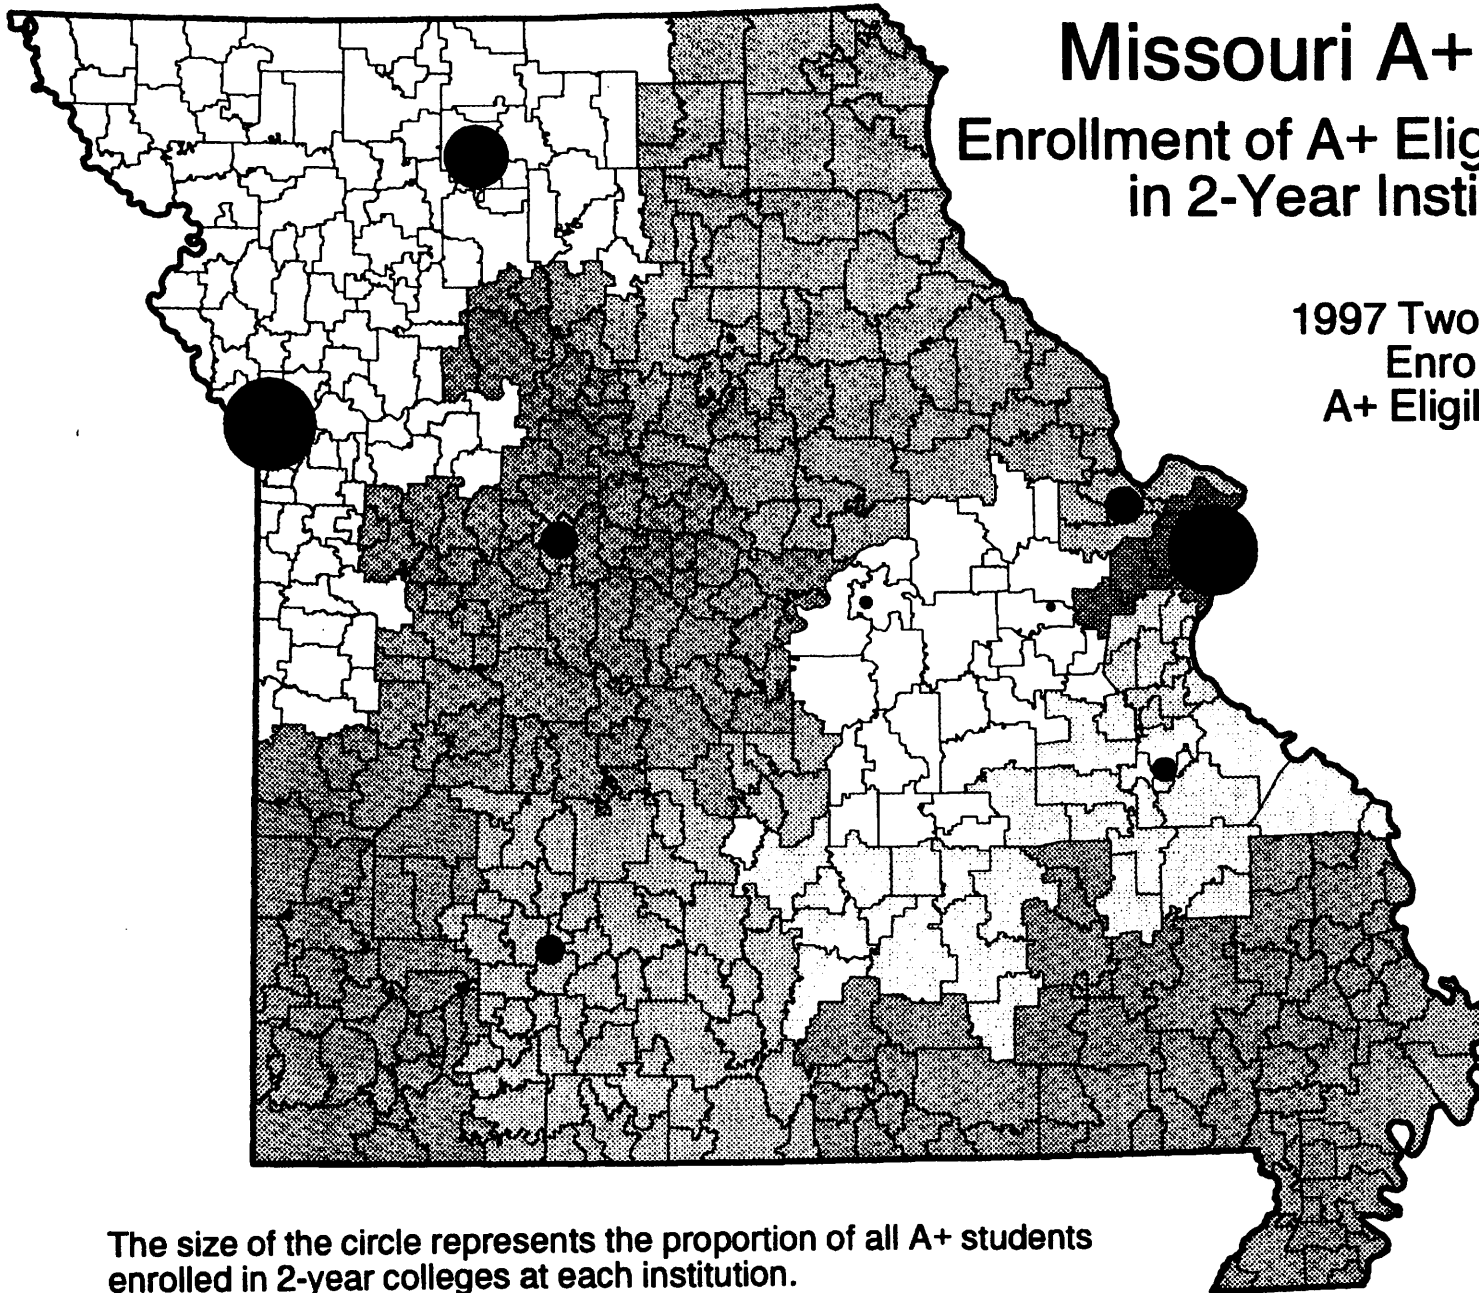

The size of the circle represents the proportion of all A+ students eligible from each A+ high school versus the proportion of A+ students enrolled.

Missouri A+ Students

Enrollment of A+ Eligible Students in 2-Year Institutions

1997 Two-Year College
Enrollment of
A+ Eligible Students

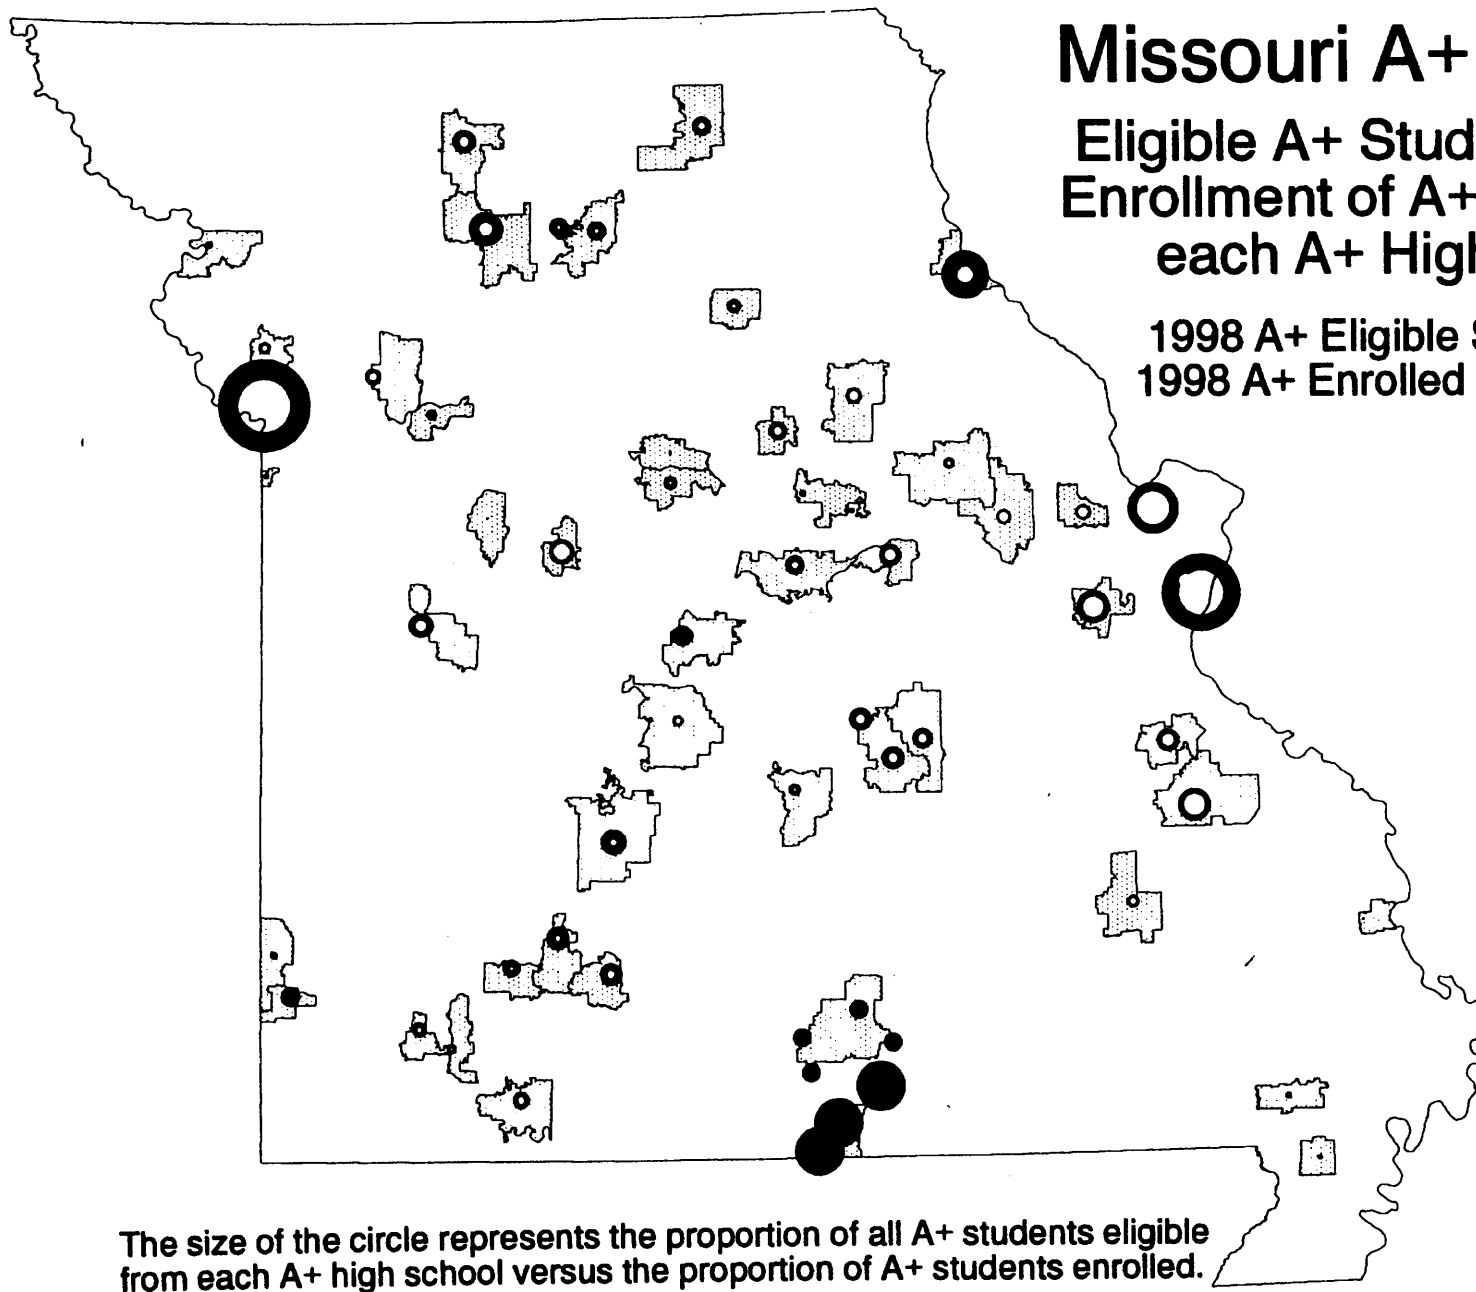

The size of the circle represents the proportion of all A+ students enrolled in 2-year colleges at each institution.

Missouri A+ Students

Eligible A+ Students versus
Enrollment of A+ Students at
each A+ High School

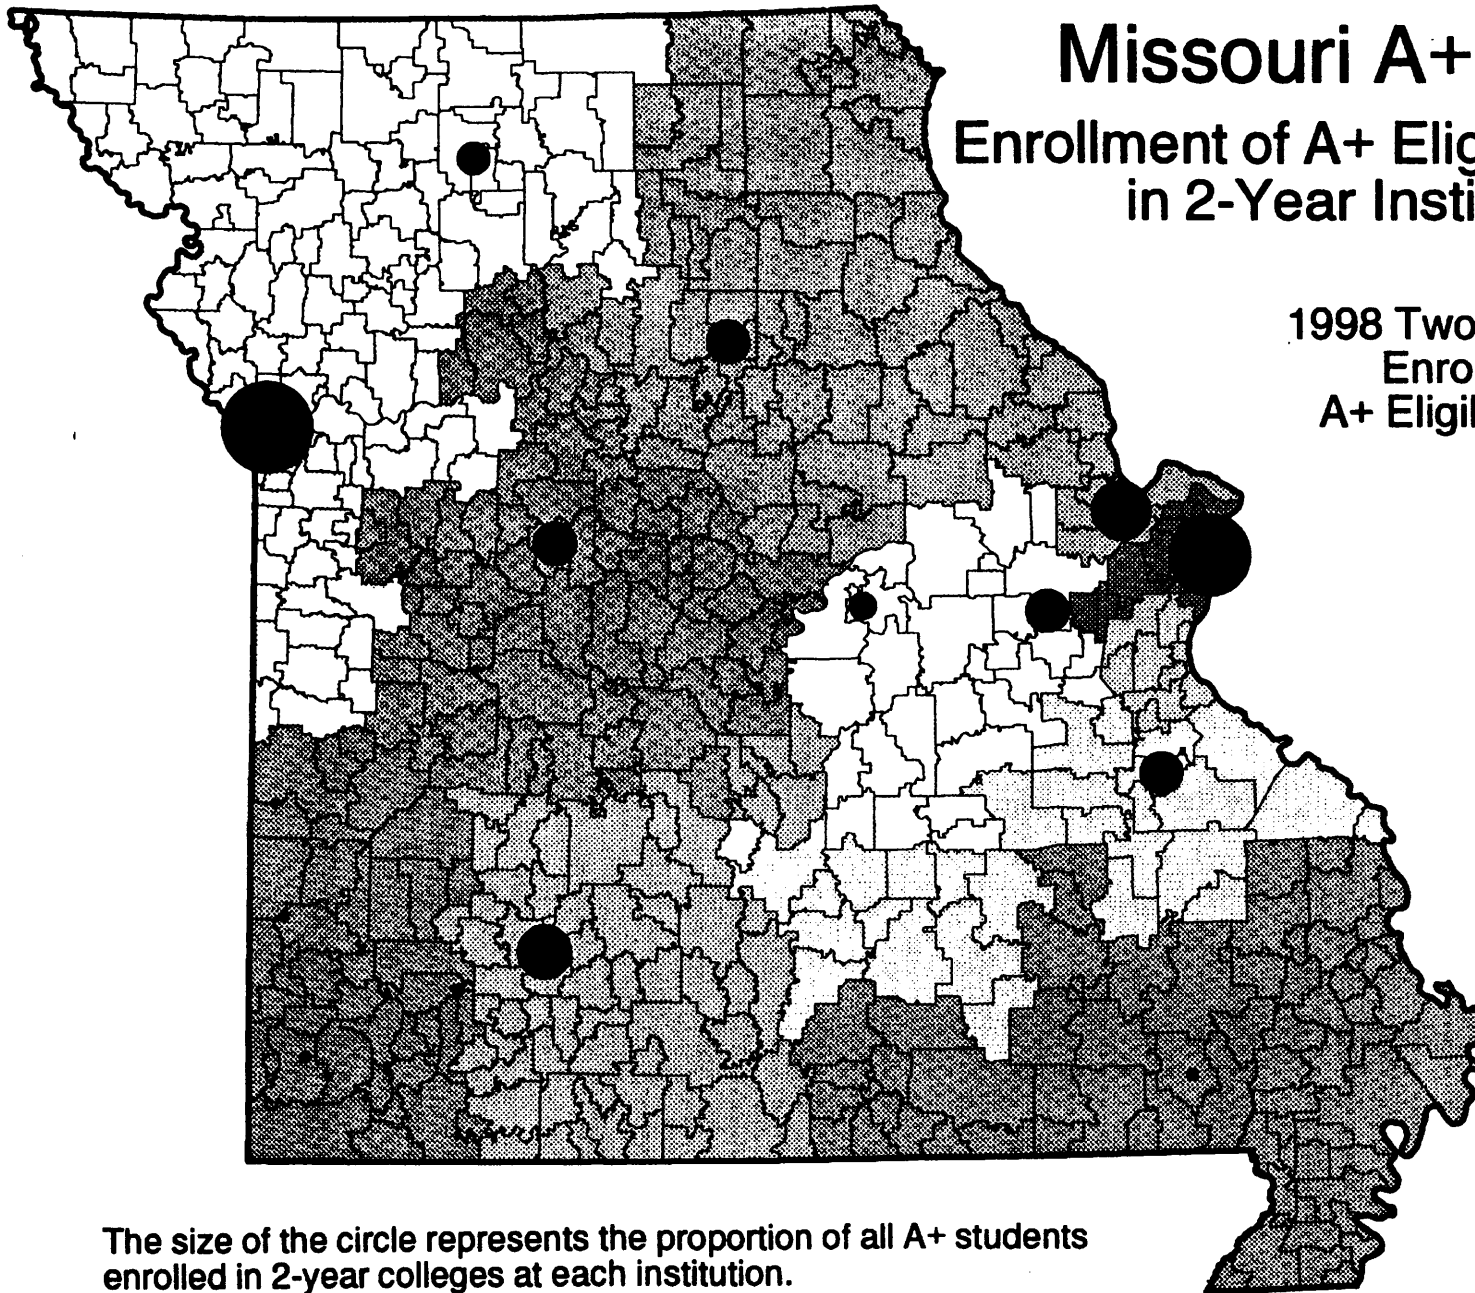

1998 A+ Eligible Students = Green
1998 A+ Enrolled Students = Yellow

Missouri A+ Students

Enrollment of A+ Eligible Students in 2-Year Institutions

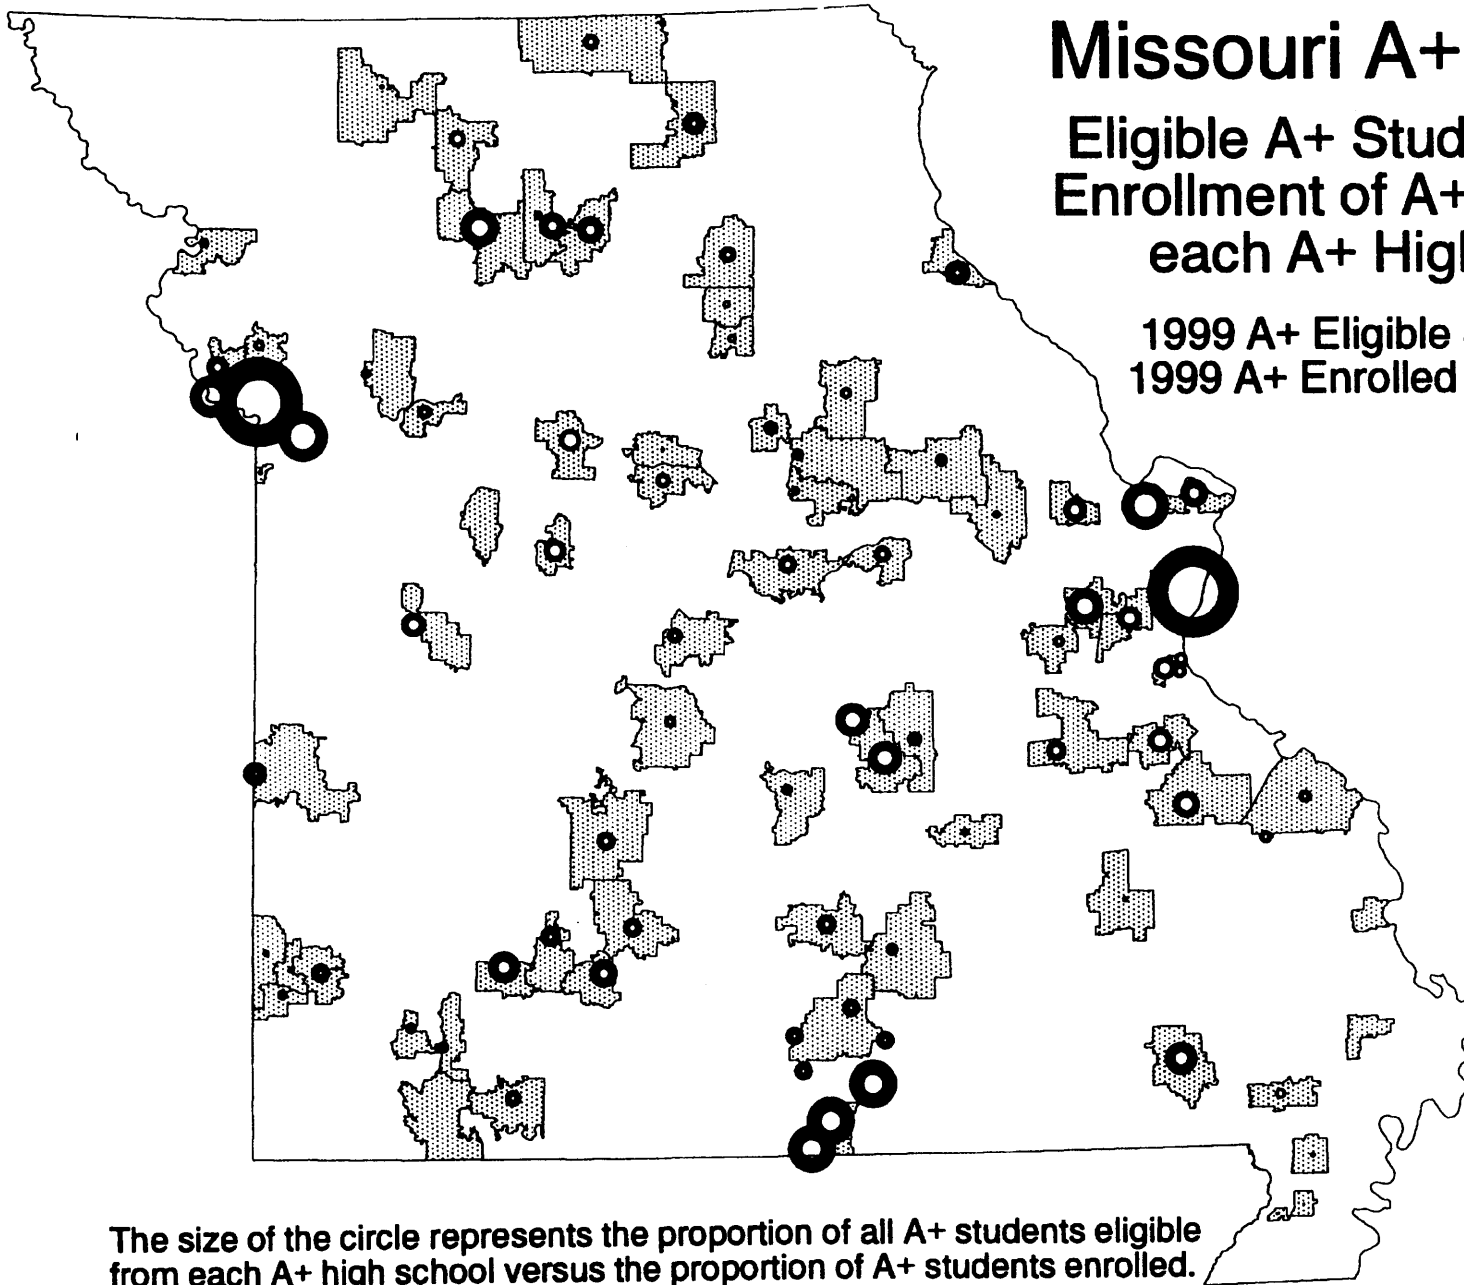

1998 Two-Year College
Enrollment of
A+ Eligible Students

Missouri A+ Students

Eligible A+ Students versus
Enrollment of A+ Students at
each A+ High School

1999 A+ Eligible Students = Green
1999 A+ Enrolled Students = Yellow

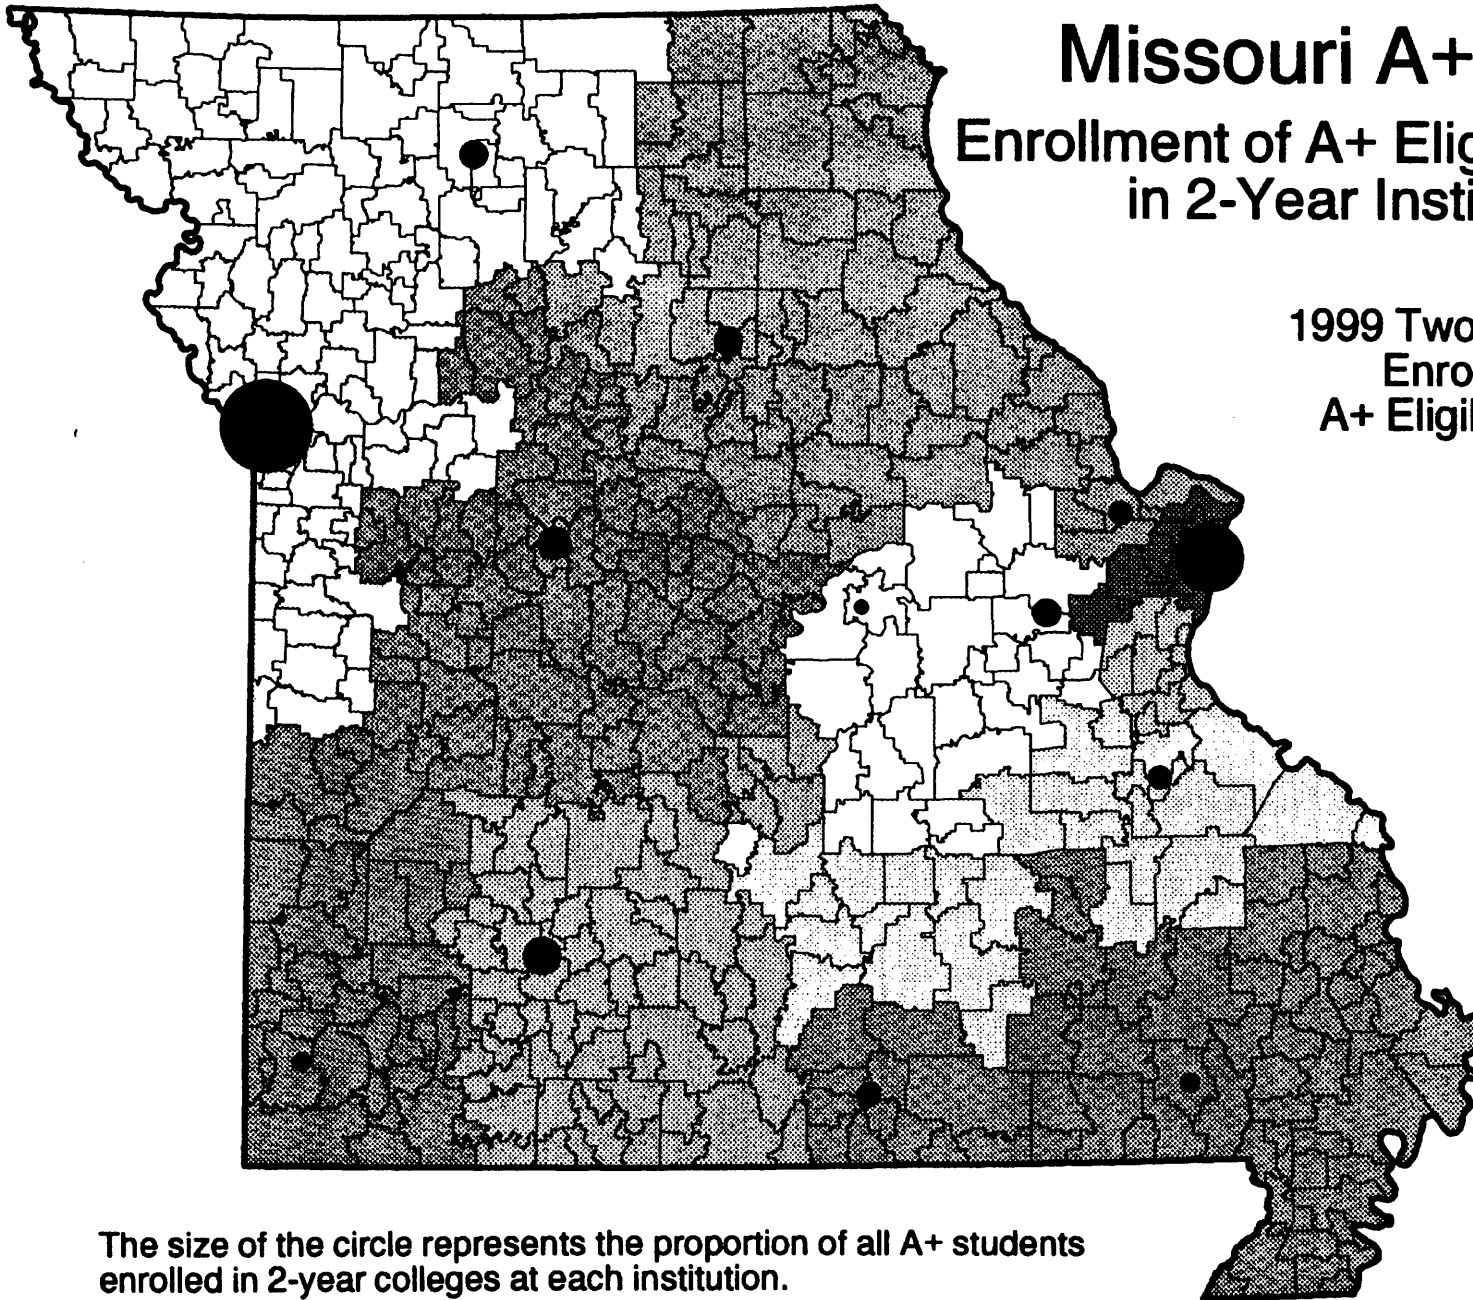

The size of the circle represents the proportion of all A+ students eligible from each A+ high school versus the proportion of A+ students enrolled.

Missouri A+ Students

Enrollment of A+ Eligible Students
in 2-Year Institutions

1999 Two-Year College
Enrollment of
A+ Eligible Students

The size of the circle represents the proportion of all A+ students enrolled in 2-year colleges at each institution.

Table 1: 1997-98 A+ Eligible Students by High School

School Name	Number Eligible	Number Enrolled	Percent Enrolled
Aurora High	7	5	71.4%
Bonne Terre North Co. Senior High	10	10	100.0%
Boonville High	3	2	66.7%
Brookfield High	36	25	69.4%
Cape Girardeau Central Sr. High	5	1	20.0%
Chillicothe High	49	32	65.3%
Emil E. Holt Sr. High	27	22	81.5%
Farmington Sr. High	9	6	66.7%
Fulton Sr. High	7	2	28.6%
Gideon High	2	1	50.0%
Jefferson City High	15	6	40.0%
